# **Global Grant Monitoring and Evaluation Plan Supplement**

Global grant sponsors for humanitarian projects and vocational training teams must submit a monitoring and evaluation plan with their grant application. This supplement contains The Rotary Foundation standard measures for each area of focus as well as the standard terminology, definitions, and measurement methods. Following these standards helps ensure that the Foundation can track worldwide Rotarian efforts and accomplishments, and publish the results using the definitions used by other nonprofit organizations.

#### STEPS FOR MONITORING AND EVALUATION PLAN

- 1. Establish clear project goals.
- 2. Identify applicable Rotary Foundation standard measures.
- 3. Identify additional project-specific measures.\*
- 4. Establish baseline data and the methods you'll use to collect data.
- 5. Submit the plan as part of the online application.
- 6. Collect data during the project, and monitor progress.
- 7. Evaluate data and submit results to the online report. Modify the documentation to include actual results.

<sup>\*</sup>Add only measures that clearly link to specific goals and will demonstrate the project's impact on participants' lives, knowledge, or health.

#### **BASIC EDUCATION AND LITERACY MEASURES**

The Rotary Foundation promotes education and literacy for all by

- Ensuring that children have access to quality basic education
- Reducing gender disparity in education
- Increasing adult literacy
- Strengthening the capacity of communities to support basic education and literacy
- Supporting studies related to basic education and literacy

Measure	Measurement Options	Data Collection Notes

#### **DISEASE PREVENTION AND TREATMENT MEASURES**

The Rotary Foundation reduces the causes and effects of disease by

- Improving the capacity of local health care professionals
- Combating the spread of HIV/AIDS, malaria, and other major diseases
- Enhancing the health infrastructure of local communities
- Educating and mobilizing communities to help prevent the spread of major diseases
- Supporting studies related to disease prevention and treatment

#### **ECONOMIC AND COMMUNITY DEVELOPMENT MEASURES**

The Rotary Foundation invests in people to create measurable and enduring economic improvement in their lives and communities by

- Strengthening the development of local entrepreneurs and community leaders, particularly women, in impoverished communities
- Developing opportunities for decent and productive work, particularly for youth
- Building the capacity of local organizations and community networks to support economic development
- Supporting studies related to economic and community development

Measure	Measurement Options	Data Collection Notes
Total number of direct	Grant records and reports	Do not simply report on the number
beneficiaries	Direct observation	of individuals living in a specific
		community or region.

	Questionnaires and surveys	new employment activities.

### **MATERNAL AND CHILD HEALTH MEASURES**

The Rotary Foundation improves the lives of mothers and their children by

- Reducing the mortality rate for children under age 5
- Reducing the maternal mortality rate
- Improving access to essential medical services and trained health care providers for mothers and their children
- Supporting studies related to maternal and child health

Measure	Measurement Options	DataCollection Notes
Total number of direct	Grant records and reports	Do not simply report on the number of

# PEACE AND CONFLICT PREVENTION/RESOLUTION MEASURES

The Rotary Foundation promotes the practice of peace and conflict prevention/resolution by

- Strengthening local peace efforts
- Training local leaders to prevent and mediate conflict
- Supporting long-term peace-building in areas affected by conflict
- Assisting vulnerable populations affected by conflict, particularly children and youth
- Supporting studies related to peace and conflict resolution

Measure	Measurement Options	Data Collection Notes

#### WATER AND SANITATION MEASURES

The Rotary Foundation ensures that people have sustainable access to water and sanitation by

- Increasing equitable community access to safe drinking water and basic sanitation
- Strengthening the ability of communities to develop and maintain sustainable water and sanitation systems
- Educating communities about safe water, sanitation, and hygiene
- Supporting studies related to water and sanitation

Measure	Measurement Options	Data Collection Notes

# **DATA COLLECTION METHODS**

Method	Definition	Useful for
Direct observation	Information collected while visiting the project site and viewing the activities firsthand	Providing/observing direct provision of a service, such as leading a training or treating a patient
Focus group/interview	In-depth conversation with an individual (interview) or multiple beneficiaries (focus group) in which specific questions are posed by the interviewer/facilitator in order to collect specific information	Digging deeper into the impacts of a project and the experiences of beneficiaries; soliciting qualitative data; can be customized to sponsors' needs
Grant records and reports	Documents kept by project sponsors on project participation, activities, and impacts for the use of Rotarians, RI/Rotary Foundation, and others	Documenting basic information (e.g., outputs, counts) required by The Rotary Foundation
Public records	Documents containing data available to the public from the government, a private entity, or other organization	Accessing standard information collected by an outside entity; can supplement information collected by the sponsors
Questionnaire/survey	An assessment tool that uses specific questions to gather data on attitudes, impressions, opinions, satisfaction levels, etc., from individuals in a beneficiary population	Gathering quantitative and qualitative data from a beneficiary group; can be customized to the sponsors' needs
Satellite imagery	Digital data obtained using a global positioning device	Recording the location of activities implemented in multiple places, such as boreholes, health clinics, schools, etc.
Testing	A procedure to determine a specific result	Determining the result of a specific activity; providing quantitative data

## **Glossary of Rotary Foundation Standard Measures**

adult individual over age 18

**adult education** training in basic skills, such as reading, writing, and proficiency in local language, for adult students

**basic education** training in basic skills, such as reading, writing, and proficiency in local language, for students 18 and under

better quality more affordable, more efficient, more effective, or a greater variety

business an income-generating activity, small business, cooperative, or social enterprise

**case of disease** occurrence of a particular illness or disease; can be measured by cumulative incidence (the number of new cases within a specific period)

**child mortality rate** the number of children who die before reaching the age of 5 per 1,000 live births

community an individual village, geographic area, or medical institution

**conflict** a dispute that has, or may potentially have, broad negative impact within a community or region

data facts, statistics, or items of information. Quantitative data (numeric) provides a view into the effectiveness of project activities. Qualitative data (descriptive) is gathered through stories, statements, or opinions. Baseline data is collected before project implementation to provide a clear picture of the situation before any intervention. Routine data is collected continuously, typically by a non-Rotary entity. Nonroutine data is collected less frequently and is typically initiated by Rotarians for the purposes of monitoring and evaluating a project.

**data collection** the process of identifying and gathering data from sources directly related to project activities

direct beneficiary a recipient of a clear and immediate benefit from project activities

disease prevention intervention an activity intended to prevent and/or treat a specific disease

**double counting** a data collection error that counts an individual or group more than once when documenting beneficiaries. To avoid, create a documentation system that includes multiple distinguishing factors of each beneficiary that can be cross-referenced across records and that ensures multiple reporting partners are not double counting.

employment formal positions and/or entrepreneurial and informal income-generating activities

**entrepreneur** a current or potential small-business owner or a person engaged in informal incomegenerating activities

**group/organization** a formal or informal collection of individuals who come together for a specific purpose

**health care services** preventive measures, such as education or screening, and treatments, such as the provision of drugs (e.g., antiretrovirals), intended to cure or alleviate the effects of a disease

**health education campaign** dissemination of reliable, fact-based information intended to increase awareness of how to prevent and/or treat a disease. Campaigns may consist of information sessions or involve a training curriculum; others may involve use of posters, billboards, radio, and other media to inform community members.

**health facility** location where health care is provided; can include hospitals, clinics, laboratories, etc.

**health-focused event** an organized gathering where attendees receive information or services intended to increase their awareness about how to prevent and/or treat disease (e.g., health fairs, trainings, disease screenings, etc.).

**household water treatment** household water treatment options proven to be effective in decreasing diarrheal diseases, such as boiling, chlorination, filtration, and solar disinfection

**impact** a direct effect of a project or activity on a person, community, etc.

**improved sanitation** flush or pour/flush facilities connected to a piped sewer system or septic system; pit latrines with a slab; ventilated improved pit latrines; composting toilets. Unimproved sanitation includes flush or pour/flush toilets without a sewer connection; pit latrines without slab; bucket latrines; hanging toilets/latrines; no facilities/open defecation

**improved sources of drinking water** piped water into dwelling or to yard/plot; public tip or standpipe; tubewell or borehole; protected dug well; protected spring; rainwater. Unimproved sources include unprotected dug well; unprotected spring; tanker-truck; car with small tank/drum; surface water; bottled water (considered to be improved only when the household uses drinking water from an improved source for cooking and personal hygiene).<sup>1</sup>

**institution** an entity involved in the direct provision of project activities

**in use** still functioning properly, being used regularly and appropriately, and maintained consistently by the beneficiary population

**job created** a position that did not exist before the project and can be directly attributed to the project

**literacy training** education that either specifically targets reading and writing skills to students 18 and older or that provides skills for teachers to use in educating adult students

**local leader** a person who occupies a place of status within the community, either in a formal or informal role

1

<sup>&</sup>lt;sup>1</sup> WHO/UNICEF Joint Monitoring Programme for Water Supply and Sanitation

maternal death the death of a woman while pregnant or within 42 days of termination of pregnancy maternal mortality rate the number of maternal deaths per 1,000 live births

**mediation** a process in which an impartial third party helps people resolve a dispute or plan a transaction

**medical and health professional** a doctor, nurse, midwife, medical student, technician, community health worker, or health educator

**monitoring** the routine process of collecting specific data as agreed upon before project implementation

**new** previously nonexistent and directly resulting from a project

**outcome** an expected positive change in the knowledge, behaviors, or circumstances of project beneficiaries as a result of the project; established before the project is implemented

**output** an activity conducted during the implementation of a project in order to reach its expected outcomes

peace-building the prevention and/or resolution of conflict

**point-of-use technology** household water treatment options proven to be effective in decreasing diarrheal diseases, such as boiling, chlorination, filtration, and solar disinfection

**prenatal care** a minimum of four visits with a trained health care worker over the course of a pregnancy. Each visit can include:<sup>2</sup>

- Monitoring of progress of pregnancy and assessment of maternal and fetal well-being
- Detection of problems complicating pregnancy
- Birth planning, advice on danger signs, and emergency preparedness

**preventive medical treatment** immunizations, micronutrient supplements, oral rehydration therapy for diarrhea, antibiotic treatment for pneumonia and other respiratory infections, administration of antimalarial (e.g., chloroquine, artemisinin), or antiretroviral drugs

recipient an individual who receives services as part of a project activity

school-age student an individual age 18 or under attending primary or secondary schools

teaching position position in a school or formal community-based education facility

**testing** an activity to determine a specific result, including water quality, retention of information, or effect of a medical treatment

training instruction on a specific topic or curriculum; may be conducted multiple times

•

<sup>&</sup>lt;sup>2</sup> WHO-Recommended Interventions for Improving Maternal and Newborn Health

**vulnerable population** a group of people considered at risk because of demographic characteristics (such as age, gender, or race/ethnicity) or economic status, illness, disability, or place of residence

water facility a system that provides water to one or more individuals, either at the household or community level

youth individuals ages 12 through 25
